Dear John,

On the one month anniversary of the opening of the new Provincetown Theater, I would like to reflect on what you, and your Augustus Construction team, have built here.

Not just a building, you have created a home for the community of theater. A home into which we have settled very comfortably. The feedback from our resident companies has been very positive about their "playhouse." And the appreciative audience response is the greatest satisfaction of all. The Provincetown Theater is a grand place, simply elegant, and capable of making great magic.

On behalf of the Construction Implementation Committee of the Board of Directors, Provincetown Theater Foundation, I would like to express appreciation for your enormous dedication to this project, and for its timely completion. Your contributions to this job were far beyond any contract requirements. And your donations of time and materials for the finish surfaces of the lobby and lounges are most gratefully recognized.

As a regular visitor to the site, since we began just before last Labor Day, I can give personal testimony to the strong sense of team spirit and high-energy that was characteristic of your crew. And special kudos to Jim Palmer. Though the roughest winter in a hundred years, he kept this project on its very rigorous construction schedule. He maintained an injury-free environment, and delivered a square, solid, tight and very functional building.

We expect it will be a landmark two centuries from now.

With sincere appreciation,

Brian O'Malley MD  
Co-President, Provincetown Theater Foundation  
Chair, Construction Implementation Committee
